

Embedded SAP[®] Expertise

Improved upstream business performance through optimal management of SAP[®] - delivered by expertise embedded within your own team.

After completing the roll out of your SAP system, it's easy to forget that it needs ongoing planning and consideration.

Absoft can help you not only maintain current functionality, but also identify where your solution could be enhanced through continuous improvement. Business needs and technologies change over time, and your SAP solution must evolve to accommodate this.

System functionality and resulting added value you are unaware of is in danger of never being unlocked within your business. We can provide you with the expertise and business cases necessary to change this.

That's why we offer embedded expertise to help you deliver more value from your SAP system on an ongoing basis. We have the combination of business, upstream oil and gas and SAP expertise to ensure you leverage the full potential from your system.

Absoft dedicated subject matter experts can work with you on a daily basis, pre-emptively handling ongoing maintenance so that any issues don't become problematic. They fully understand your system design. They provide structured advice and scenario based business cases for SAP improvements in line with your business requirements and system architecture.

And it's just not the expertise of one, or a few dedicated consultants that you will have access to. It's the industry knowledge Absoft has built up over decades of working with the world's leading players. Our solutions are proven to work.

With Absoft expertise, no time is wasted, no business agility is lost.

We deliver:

- Dedicated SAP subject matter experts, working with you in person on a daily basis
- Quicker response, working in partnership with your own SAP support function
- Better long term performance and value from SAP

- Access to expertise from our wider consultancy team, including industry specific best practice and benchmarking
- Knowledge transfer from our team to yours
- Flexible contract structures and multifunctional delivery

Our SAP capabilities encompass all IT, Finance, HR, Supply Chain, Logistics, Operations and Maintenance requirements. Ultimately we help you better engage your internal teams, standardise processes and introduce better business control. We will enable you to become SAP self-sufficient through knowledge transfer.

Trust the experts

Seven of the highest profile global oil and gas operators in the North Sea alone, including two supermajors, are already taking advantage of our embedded expertise to help drive business improvement.

It's time to look at SAP as a means of improving the performance of your business, not as an inconvenience. Plug Absoft into your team - and see the difference we can make.
