

Simplify the Software Experience on Any Device with Consumer-Style Apps

The Best-Run Businesses Run SAP™

Keep routine tasks simple with
SAP® Fiori™

Keep routine tasks simple with SAP® Fiori™

The way people work, consume content, and experience technology to get things done is rapidly changing. There are growing expectations and demands in the workplace for consumer-friendly interfaces. SAP is redefining how business users perform daily tasks by creating **a more intuitive format and user experience** – similar to the way they interact with technology in everyday life.

The overall experience of consumer apps is quickly becoming the new standard for enterprise applications and is rapidly redefining the business experience. Business users want the same ease of use and convenience with their enterprise software that they experience with their consumer apps.

Addressing the needs of today's business user, SAP® Fiori™ apps help employees get their jobs done easily – anytime, anywhere. This collection of apps offers a simple user

experience for SAP software functions that are broadly and frequently used and works seamlessly across any device, including desktop, tablet, and smartphone.

SAP Fiori includes more than 25 apps for the most common business functions, such as workflow approvals, information lookups, and self-service tasks. The apps also support four user roles: manager, employee, sales representative, and purchasing agent.

Improve the user experience

Work seamlessly across devices

Make better use of your existing
SAP software investment

Designed to create a simple and easy-to-use experience, SAP Fiori can help people complete core business tasks across HR, finance, procurement, and sales more efficiently.

By simplifying and modernizing the user experience, casual business users can easily input a travel or leave request, submit an

approval, or quickly look up specific information such as tracking a purchase order or shipment. Now idle time, such as waiting in line, can become productive by allowing users to quickly access SAP Fiori, review notifications, and complete tasks while on the go.

“SAP Fiori is as easy to use as Facebook, Google, or Amazon.”

Benjamin Salter, Enterprise Architecture and Application Development, Valero

Work seamlessly across devices

Improve the user experience

Work seamlessly across devices

Make better use of your existing
SAP software investment

Business users expect to complete their job wherever they are and on whatever device is handy. They may begin their day by approving urgent requests on a smartphone while waiting for a coffee, then use a laptop to create a sales order or submit a time sheet at their desk, and, finally, use a tablet before or during a meeting to look up information, such as the status of a shipment or customer invoice.

SAP Fiori provides a seamless experience across all of these devices to help business users complete these tasks with ease. By leveraging responsive design principles, the apps are sensitive to various device form factors with a single user interface. This helps ensure a consistent user experience across desktop and mobile devices – eliminating the need for extensive user training. Also, processes and information can be accessed from virtually any desktop or mobile device.

With SAP Fiori, business users can be more productive and impact business results.

Make better use of your existing SAP software investment

Improve the user experience

Work seamlessly across devices

**Make better use of your existing
SAP software investment**

Customizing and deploying apps with an improved user experience no longer needs to be time consuming and expensive. With SAP Fiori, you can get started immediately, make better use of existing SAP software investments, and bring instant value to every employee.

SAP Fiori leverages SAPUI5 and SAP NetWeaver® Gateway technology to provide comprehensive extensibility. It is delivered with the theme editor function of SAPUI5, enabling customers to brand and easily design a theme for apps without the need for coding. In addition, the functionality of SAP Fiori apps can be extended by enhancing SAP Business Suite applications, SAP NetWeaver Gateway, or layers within SAPUI5.

IT teams can customize and extend SAP Fiori by using SAP standard extensibility tools.

Improve productivity and impact business results

Improve productivity and impact business results

Companies that adopted SAP Fiori early on reported business benefits, including increased employee productivity and satisfaction, reduced work completion time, and better adoption of business processes.

Benefits for the individual user:

- Use of short downtimes to get daily tasks done
- Access to processes and information – anytime, anywhere, and from virtually any desktop or mobile device – to get the job done with certainty
- Tasks that are a pleasant experience to complete with a simple user interface

Benefits for the overall business:

- Lower travel and procurement costs by reducing delays in process approvals
- Employees who are free to work on more creative, high-value tasks
- Improved employee morale

Benefits for the IT function:

- Support of a consumer-style user experience desired by employees
- Better use of SAP software investments through easy-to-use common functions available anytime, anywhere, and on any device
- Reduced investment in custom user-experience projects, lowering total cost of ownership and development of SAP software

SAP Fiori enables better adoption of business processes and reduced work completion time.
