

Supply Chain Execution

How can SAP® solutions enable you to change the game?

With supply chain execution solutions from SAP, food, drug, and convenience retailers can purchase and distribute the right products to the right warehouses, stores, and customers at the right time. They can manage inventory, warehouses, and transportation. They can also monitor supply chain events and performance.

What do SAP solutions help customers do?

Supply chain data and insights

Manage supply chain data, enable demand and supply insights, and monitor supply chain performance.

Merchandise buying

Manage detailed vendor agreements and the buying process from purchase orders to matching invoices.

Omnichannel inventory and order response

Gain real-time inventory visibility and management, and fulfill demand optimally from anywhere.

Logistics and fulfillment

Manage advanced warehouses, and coordinate transportation within the entire supply chain network.

Key facts

-30% Stock-outs

With visibility of real-time inventory*

-13% Cost of carrying inventory

Using what-if scenarios to evaluate solutions to supply chain challenges*

What are the benefits?

Supply chain solutions from SAP help food, drug, and convenience retailers respond to demand through:

- Real-time inventory visibility and supply chain monitoring to secure fresh products
- Increased revenue opportunities by enabling fast response to unexpected events
- Improved cost savings from automation and an optimized supply chain
- Optimized inventory and service levels across the distribution process
- Synchronized multitier supply activities for compelling product ranges that attract shoppers

Why SAP?

Retail solutions from SAP based on the SAP HANA® platform and available in the cloud deliver unified and simplified business processes. The solutions help you understand your customers, plan and execute on strategy, and monitor your business in real time.
