

Why Absoft? Absoft understands the energy sector having provided SAP expertise to operators, oilfield services companies and the drilling and marine sectors since 1991.

Absoft's sole focus is to help our clients get the best possible return on their investment in SAP. We work with you to clearly understand your business goals and expectations and define a scope of work, then bring together the right skills from our large pool of experienced consultants to successfully deliver your project.

We listen, assess, advise and educate and we're pro-active, sharing knowledge and experience of the latest developments in the SAP product range, helping customers understand how new features and technologies could benefit them.

Our functional and technical consultants combine unrivalled SAP expertise with in-depth knowledge of how the upstream oil and gas sector works. This is underpinned by Absoft's continuous investment in staff training and development and infrastructure.

Take the first step towards realising the true potential of SAP in your organisation by calling Absoft today:

Driving operational excellence and enhanced business performance through SAP® best practice.

Get more out of your SAP system with Absoft's SAP consultancy. You've made the investment in SAP, you're working with it, but perhaps it's not delivering quite the business benefits that you expected.

Rapidly changing operational environments, organisational development and mergers and acquisitions can all impact on system performance. With over 20 years experience in delivering SAP solutions to the oil and gas sector, Absoft has the know-how to help you start driving real value from your system and maximise the return on your investment in SAP.

This assistance is delivered by our team of experienced SAP consultants through our core services which support upstream oil and gas operations in the areas of:

- SAP Implementations
- Efficient Operations
- Safety & Compliance
- Growth & Acquisitions
- Embedded SAP Expertise
- Integrated SAP Support

About Absoft

Founded in 1991, Absoft is a SAP specialist for upstream oil and gas. We are working with leading players in the industry and have been for over 20 years, uniquely combining business process oil and gas and SAP expertise to deliver best practice solutions globally.

We are distinguished by our reputation for delivering solutions of enduring value to our customers through a combination of technical expertise, best practice and innovation.

Our commitment to customer focus is supported by the fact that our first client has remained loyal to us for over 20 years.

Absoft's extensive upstream oil and gas client list ranges from small service companies to major operators. We have delivered projects in 39 countries, working with a range of companies in Norway, including Fred Olsen Energy, Dolphin Drilling, FMC Technologies and Centrica Upstream Europe.

Some of our engagements include:

Project: Plant Maintenance optimisation
Role: Optimisation partner

Project: Global upstream template design and implementation
Role: Implementation partner

Project: SAP Finance and Supply Chain implementation
Role: Implementation and training partner

Project: Payroll implementation
Role: Implementation partner

Project: SAP Finance implementation
Role: Implementation and training partner

Project: HR and Payroll and Personnel Logistics implementations
