

# Safety & Compliance

Achieve safe and compliant operations through better control and reduced risk - delivered by the oil and gas SAP® specialists.

On any vessel, rig or platform there are thousands of pieces of safety critical equipment in use at any one time. Maintaining and controlling the risks for all this equipment is vital.

## How do you:

- Ensure safety for people, assets and environments
- Find the best way to manage maintenance complexity
- Fully comply with regulations and maximise uptime
- Reduce the risk of lost production and revenue

We are the only accredited SAP® partner in the world to offer this specific oil and gas service. Absoft provides the expertise and best practice knowledge to streamline your operations and ensure compliance. Our highly specialised consultants have in depth knowledge of ISO 14224, KP4, NORSOK Z-008 and PAS 55 to name a few.

## We enable enhanced management of:

- Safety critical equipment for improved compliance rates
- Logistics, certification and tax compliance for moving equipment
- HR compliance
- Predictive and preventative equipment maintenance and cost efficiency

## Trust the experts

We have helped clients achieve DNV certification with our maintenance management solutions in the most stringently regulated environment in the world, the Norwegian Continental Shelf (NCS).

One of our clients couldn't move its rig into the NCS due to failed compliance issues. This could have delayed the start of their drilling contract for up to 12 months with significant revenue loss plus penalty charges. We helped them implement the processes they required to achieve certification within 3 months, avoiding revenue losses that could have totalled £200 million.

Our expertise and track record mean we can set up the processes you need to remain safe and compliant with minimal administrative burden and effort. Ensure you stay in control and reduce your exposure to operational risk. Call in the oil and gas specialists.
