Maintenance recommendations based on:

> SAP product versions
> Current patch levels
> Maintenance end dates

12 · 1 Planning and budgeting cycle begins

Case study

Faced with ageing SAP components and a technical stack that was beyond end of life, an organisation turned to Absoft for help.

Our road map service combined technical and functional expertise to integrate a move to a new platform with an ERP upgrade that facilitated the removal of SRM.

Outcome: Significant cost of ownership reduction for the client.

Case study

Absoft recently produced a roadmap to achieve a corporate requirement for use of a new virtualisation platform.

Outcome: Project and ongoing costs were reduced and infrastructure complexity and license costs were minimised for the client.
