Complex SAP Data Visualisation with Microsoft Power BI

Create a data-driven culture with business intelligence for all

It has never been more important for businesses to make data-driven decisions to remain competitive. More and more companies are using Microsoft Power BI to enable their transition to a data-driven enterprise.

Unlocking the data in complex SAP systems provides the best insight into the core of a business, but how can complex SAP data be used in Power BI?

Challenges with SAP data in Power BI

- Data Modelling
- Data Visualisation
- SAP Licensing
- Data Warehousing
- Technical Connectivity
- Data Access Control

Absoft
Your One-Stop Shop for SAP and Microsoft Solutions

- SAP and Microsoft Gold Partner
- 30 years of SAP experience, 10 years of SAP in the cloud
- Bespoke, collaborative solutions
- Enablement and training
- ERP 6.0 and S/4 HANA
- Highly skilled and fully certified UK based team

"We have worked with Absoft's consultants to achieve interactive reports that give us great insight into our daily operations. By using Power BI, we are no longer having to look up data across multiple screens in SAP, instead we are seeing everything we need at a glance."
Charles Marshall, Marshall Trailers' MD

Absoft's Solutions for SAP data in Power BI

Companies with existing Microsoft 365 or Azure subscription can benefit from our SAP reporting through Microsoft Power BI solutions. We use our SAP expertise to make custom data views in SAP, or utilising the pre-existing views in your SAP system, to effectively model and display data in Power BI. Furthermore, we offer connection to your SAP system, and end to end reporting management – connection, modelling and visualisation.

Standard and Custom APIs provide live access to SAP data in Power BI, with or without data warehousing.	User licensing and data access control is enforced by SAP standard controls in the application, whilst semantic metadata enables Power BI users to use complex SAP data without SAP skills.	Absoft's team is fully skilled and certified in both SAP and Microsoft Power BI and ready to provide you with an end-to-end solution.

Enable data-driven insights and business intelligence with Absoft's solutions for complex SAP data in Microsoft Power BI. Get in touch with our analytics team:
